

## Getting Started: primeros pasos en Angular

Alumno: Adrian Valdivieso Paredes

1. Creamos la carpeta donde vamos a iniciar el proyecto:

2. Iniciamos la consola de Visual Studio Code y escribimos el siguiente comando:

3. Ejecutamos este nuevo comando Set-ExecutionPolicy -Scope CurrentUser -ExecutionPolicy RemoteSigned, esto hace que clientes de Windows puedan ejecutar Scripts de PowerShell porque por defecto están desactivados.

4. Crearemos el Wrok-Space con el siguiente comando: ng new my-app y le daremos el nombre de my-app, aceptamos por defecto todas las opciones que nos salen.

```
PS C:\Users\Adri\OneDrive\Documentos\Segundo Curso\PMDM\1Evaluacion\Step_By_Step> ng new my-app
? Would you like to share pseudonymous usage data about this project with the Angular Team at Google under Google's Privacy Policy at https://policies.google.com/privacy. For more
details and how to change this setting, see https://angular.io/analytics. Yes
Thank you for sharing pseudonymous usage data. Should you change your mind, the following
command will disable this feature entirely:
   ng analytics disable --global
Global setting: enabled
Local setting: No local workspace configuration file.
Effective status: enabled
? Would you like to add Angular routing? Yes
? Which stylesheet format would you like to use? (Use arrow keys)

  Installing packages (npm)...
```

5. Nos movemos a la carpeta que acabamos de entrar y ejecutamos el siguiente código para levantar el servidor:

```
PS C:\Users\Adri\OneDrive\Documentos\Segundo Curso\PMDM\1Evaluacion\Step_By_Step> cd my-app
PS C:\Users\Adri\OneDrive\Documentos\Segundo Curso\PMDM\1Evaluacion\Step_By_Step\my-app> ng serve --open
} Would you like to share pseudonymous usage data about this project with the Angular Team
at Google under Google's Privacy Policy at https://policies.google.com/privacy. For more
details and how to change this setting, see https://angular.io/analytics. Yes

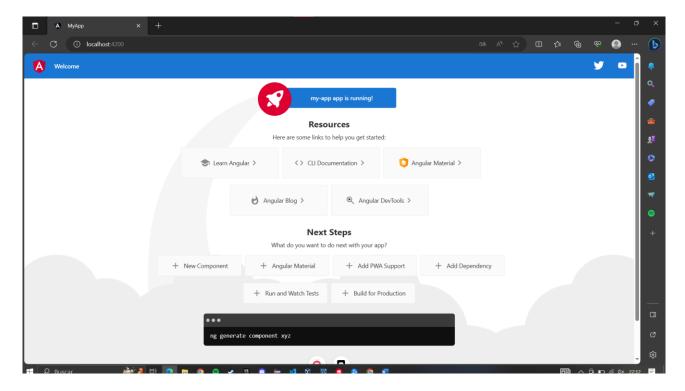

Thank you for sharing pseudonymous usage data. Should you change your mind, the following
command will disable this feature entirely:

ng analytics disable

Global setting: enabled
Local setting: enabled
Effective status: enabled
Effective status: enabled
"Generating browser application bundles (phase: setup)...

Generating browser application bundles (phase: setup)...
```

6. El comando ng serve lanza el servidor, revisa los archivos y los cambia según los cambios realizados en los archivos. El comando –open inmediatamente abre el navegador y si todo ha ido bien se debería ver la siguiente pagina:
